Allowable Subject Matter

1. Claims 5 and 9-11 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. Instant claims are drawn to a method of suppressing smell change or odor generation with passage of time in a cosmetic comprising at least one surfactant having an oxyethylene group selected from formulae 1-3 and a suppressant comprising t-butanol in an amount of 0.01 to 1000 ppm based on the total weight of the composition, wherein the suppressant suppresses the smell or odor generation caused by the at least one of the said surfactant. The prior art of record recognizes that alkoxylated surfactants possess odor or smell (US 4,592,875, US 6,376,721) and suggest ways to inhibit or reduce the odor, such as adding organic acids like maleic acid (EP 0666304) to the compositions comprising the above surfactants. Even though t-butanol has been employed to reduce the odor caused by bleach, the art does not teach or suggest employing t-butanol for reducing the odor or smell change caused by oxyethylene surfactants. Additionally applicants have shown that t-butanol is effective in odor suppression caused by the claimed surfactants only in the range of 0.01 ppm to 1000 ppm t-butanol.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
